## AUTHOR'S INSTRUCTIONS FOR PREPARING QM2006 ABSTRACTS

### A. Author<sup>a</sup> and B. Author<sup>b</sup>

<sup>a</sup>Department of Physics, The University of Physics  
City, State, Zip Code, P. R. China, *author1@physics.edu*

<sup>b</sup>Department of Applied Physics, 1000 Research Road  
The University of Applied Physics, City, State, Zip Code, USA, *author2@dap.edu*

For each Conference presentation, an abstract is required that summarizes the presentation. The abstract submission process has several steps: (1) submission of a preliminary, initial abstract, by August 1, 2006, and (2) notification of abstract acceptance, by August 30, 2006. The abstract length should not exceed 1 page.

An equation might look like this:

$$H\Psi = E\Psi, \quad \text{where} \quad H = -\frac{\hbar^2}{2} \sum_i^A \frac{\nabla_i^2}{m_i} + \frac{1}{2} \sum_{j \neq i}^A V_{ij} + \text{three-body forces} + \dots$$

The one-page abstract must contain (1) the presentation title, (2) names of the presentation authors, and (3) contact information for the corresponding author, including authors' postal and e-mail addresses. Templates for the preparation of the abstracts in LaTeX format may be found on the QM2006 website (<http://www.sinap.ac.cn/qm2006/>).

**You are encouraged to submit the LaTeX files of your representation to *QM2006@sinap.ac.cn*.**
